Want to be an Admissions Alumni Ambassador?
Let the fun begin!

The Admissions Office is thrilled of your interest in our Alumni Ambassador Program and we want you to know how much we appreciate your significant contributions to UNH’s Admissions operations. You provide a critical UNH presence where admissions professionals may not otherwise be visible. The higher education market continues to become more competitive each year, making your help in identifying and recruiting strong students to UNH, a vital part of our recruiting efforts.

This Handbook is designed to serve as an introduction to the admissions process and the University’s recruitment efforts. It will also provide you with the necessary training information for your volunteer involvement, including tips for college fairs, protocols for writing postcards or letters to students, and expectations for staffing on or off campus events. It is important to take time to review these materials to be prepared to answer the questions you will encounter as you meet people who are interested in UNH.

Again, thank you for your enthusiasm and your commitment to UNH and to this program. I hope you find your experience rewarding and fun. Enjoy yourselves as you remember, reconnect, and recruit for the University of New Hampshire! Should you need any additional information, materials, or you just want to introduce yourself, please feel free to contact me!

Sincerely,
Joshua Kellogg
Program Coordinator

IX. Frequently asked questions
I. Introduction to College Admissions

Overview:

In general, admissions at a university will serve a dual purpose. The first being to support students and families through the somewhat complex, college admissions process. This could be answering questions about the application, explaining admissions criteria, or relaying important information and deadlines.

The second purpose of admissions is to recruit the best possible students to the institution. Goals are set for the size of the incoming class and it is admissions job to fill that class with the most capable students. In this effort, admissions officers will travel all over to meet students at college fairs, visit them in their high schools, or host receptions and events. Admissions will also often communicate with students and families, either through mail or electronically, advertising the merits of their institution.

The Annual Admissions Cycle:

College admissions largely works in a fairly predictable annual cycle. Understanding this cycle will not only provide you with more context about how admissions works, but it will also help you plan for when there are likely to be more volunteer opportunities.

Fall (Sep-Nov)

- September marks the beginning of travel season. Admissions counselors will travel all over the country and visit hundreds of high schools as well as attend numerous college fairs.
- Campuses will host a number of on campus events and tours for prospective students
- Most institutions have their early application deadlines in November

Winter (Dec-Feb)

- Application review begins and students will learn their admissions decisions
- Admissions will continue to communicate with students, either congratulating them on being admitted or encouraging them to apply if they have not yet done so.
- The final application deadline for most institutions will be in Jan or Feb
Spring (Mar-May)
- Counselors will once again travel as the majority of the national college fairs take place in the spring.
- Institutions will host various on and off campus programs, encouraging admitted students to enroll
- May 1st is the enrollment deadline. This is when students need to commit to an institution they’ve been admitted to.

Summer (Jun-Aug)
- This tends to be the quietest time of the year for admissions. Summer marks the end of a recruitment cycle and the beginning of the next!

NACAC:

The National Association of College Admission Counseling (NACAC) is the main professional organization for admissions. As such, NACAC sets the foundation for the guidelines and best practices pertaining to the admissions fields. Click here for more information about the NACAC organization.
II. Overview of Admissions at UNH

Admissions Mission Statement:

The UNH Admissions Office commits itself to supporting students and their family members as they examine the issues involved in a successful college selection process. We support and promote access to post-secondary experiences that appropriately encourage educational attainment and diversity in its broadest interpretation. We will achieve institutional success through collaboration with the University community and in accordance with University objectives.

Student Recruitment:

Each admissions staff member is assigned a different territory, or region of the country. That staff member will work with students coming from their assigned territory, and will be the one to travel and recruit in that given geography.

UNH attracts students from all of the U.S. and the world, however admissions only actively recruits in certain areas. Below is a list of the states in which UNH admissions actively recruits:

- All New England States
- California
- Colorado
- Delaware
- D.C.
- Florida
- Georgia
- Illinois
- Maryland
- Minnesota
- New York
- New Jersey
- North Carolina
- Pennsylvania
- Virginia
- Washington

For more information go to - https://admissions.unh.edu/who-my-admissions-counselor

We do also have 2 admissions staff members who work specifically with transfer students and 1 who works with international students.
The Application Process:

Applying to UNH
The admissions office supports a paperless application process meaning we review all applications electronically. The following items make up a student’s complete application package:

- **The Common Application**
- Official ACT or SAT scores
- 1-2 Letters of recommendation
- Official high school transcript
- Students should NOT send any additional materials aside from what is required in the application checklist (i.e. no art portfolios, CDs, photo collages, newspaper clippings, etc.).

General Admissions Requirements
This information is general and good to have committed to memory. As always, this information is online as well. You should feel comfortable speaking in general terms about the admissions process. It is important to keep in mind that we take a holistic approach when reviewing applications, meaning we take a number of factors into consideration and do not have strict numerical cut-offs.

Most successful candidates present:

- **Strong Coursework**
  - 4 years of English
  - 4 years of college preparatory math (1 year beyond algebra 2)
  - 4 years of laboratory science
  - 3-4 years of social science (i.e. history, etc.)
  - 3-4 or more years of study in a single foreign language

- Academic Achievement - most successful applicants have maintained a B or B+ average and higher throughout their four years of high school
- Appropriate Course levels—courses should be at the college prep level; if honors and Advanced Placement level courses are available and subject matter teachers and guidance counselors recommend this placement for the student, we expect to see students take these more demanding courses.
- Competitive Standardized Test Scores - The average SAT score is 1180. Students may submit results of the ACT instead of the SAT. The average ACT score is a 25. If students take the ACT they are required to take the optional writing portion if they plan to submit their scores to UNH

**Notes**
- SAT Subject tests are not required.
- There are no cut-offs or minimums for test scores in the UNH admissions process. Testing is not a significant factor in the admissions decision making process at UNH.
• Character, Leadership, Initiative, Special Aptitude, and Talents- These are evaluated through recommendations and information the candidate provides about extracurricular activities and employment in the application.

Additional Admissions Requirements:
CEPS, COLSA and the Paul College require additional math preparation. For students applying to a major in one of these colleges, they must have completed a year of math beyond Algebra 2. For CEPS or COLSA applicants, this math should be trigonometry or precalculus. The admissions committee will also pay particular attention to a student’s grades in math and the math section of their SAT/ACT.

Competitive Majors:
Due to high student demand and a limited number of spaces available, some majors are especially competitive. For such majors, we do set cutoffs for students’ SAT scores, gpa and class rank (if available). The exact criteria can vary from year to year, so responses to questions about these programs should be general.

Below is a list of the competitive majors from 2016-2017.
• Nursing
• Occupational Therapy
• Exercise Science
• Communication Sciences and Disorders
• Athletic Training
• Mechanical Engineering
• Undeclared Health and Human Services

Thompson School of Applied Sciences:
The Thompson School houses UNH’s associate degree programs in applied science. Unlike some community colleges, the Thompson School does not have open enrollment, and is somewhat selective in its admission.

Most Thompson School candidates will have:
• At least a C average in high school coursework
• Motivation demonstrated in the appropriate career field.

Applicants to the Thompson School also need to submit official SAT/ACT scores and a letter of recommendation.
Thompson School students may participate in all UNH extracurricular activities except intercollegiate athletics (this is an NCAA rule). They also live in the residence halls, eat in the same dining halls and pay the same tuition and fees.

An appropriate Thompson School candidate is a student with a specialized career interest who prefers hands-on experience. The Thompson School is not an appropriate choice for someone who wants a Liberal Arts/General Studies Associates degree

Transfer Admissions:
An applicant is considered a transfer student if they had previously enrolled at another institution or accumulated more than 16 credits at any institution. Most successful candidates will have at least 2.8 or above college gpa. Some programs will have stricter criteria, requiring at least a 3.0 and strong performance in specific pre-requisite courses. In addition, due to space restrictions, some programs are closed or restricted for transfer students.

For more information about transfer admissions, including a current list of restricted majors, visit our transfer webpage.

Application Deadlines:

Freshman Applicants:
- Nov 15th - Early Action deadline
- February 1st - Regular Decision deadline
- March 1st – FASFA deadline
- May 1st – enrollment deadline

Transfer Applicants:
- April 1st – regular deadline
- March 1st – FASFA deadline

Additional Notes:
- Spring admission- the vast majority of students apply with the intention to enroll in the fall of the following year. We do however accept applications for spring semester. A limited number of students do apply and enroll in the spring every year. The deadline for both freshman and transfer students to apply is October 15th.
- Students may apply any time after the start of senior year and before the February 1 deadline. Admission decisions are mailed on a continuous basis through April 15.
• Early Action versus Regular Decision – early action is a non-binding deadline, meaning that students are not obligated to enroll at UNH if they are admitted (some schools do have binding deadlines). If students apply by Nov. 15th they will receive a decision by mid-January at the latest. Some early applicants may be “deferred” to the regular applicant pool if the admissions committee requires a student’s mid-year grades to make a final decision. Also note that the admissions criteria is the same for both deadlines.

Financial Aid:

In total, approximately 80% of incoming students will receive some form of financial aid, whether need-based or merit-based aid.

Costs of Attendance:
The 2016-2017 direct costs of attendance, including room and board, are as follows:

• NH Resident $29,333
• Non-Resident $43,903

Need Based Aid:
Students must file the FASFA by the March 1 deadline to be considered for need based financial aid. The amount of aid a student receives is based on the student/family’s financial situation. Not all students will receive need based aid, but approximately 60% of incoming students will to some degree. Need based awards are managed by the UNH Financial Aid Office, and questions concerning financial aid should be directed there.

UNH is a “need blind” institution. This means that the admissions office is not aware of an applicant’s potential financial need, and therefore students’ financial situations are not a factor in the admissions process.

Merit Based Scholarships:
These scholarships are based solely on an applicant's academic/personal achievements and are not related to financial need. These awards are managed by the admissions office, including the criteria and award amounts.

Applicants are considered for merit awards automatically: there is no separate application involved. The criteria for merit based awards can vary, so responses to these questions should remain general. They will however be based on a combinations of a student’s class rank (if available), gpa, and SAT/ACT results.

For more information on merit scholarships, please visit our merit scholarship page.
III. Staffing a College Fair

Overview:

College fairs are a major component of admissions recruitment efforts. UNH admissions attends a number of fairs each year, all over the country. Fairs can vary a great deal in terms of size and audience, but generally follow a fairly standard format. Setup much like an expo, colleges will stand at assigned booths and answer the questions of guests as they come up. Fairs will generally last 2-3 hours.

Fair Types:

- Local/High School Fair – These fairs tend to be small, and will consist of students from a single high school, or few high schools from the immediate area. Often held in the gymnasiums or event spaces at the high school.
- Regional Fair – regional fairs will be draw from multiple high schools in the surrounding area. The number of students in attendance will be much larger, as will the number of colleges represented. Often held in a large public space or on the campus of a college or university.
- National Fair – national fairs are run by the NACAC organization. Student numbers will typically be in the thousands and hundreds of colleges will be represented. National fairs take place in major cities across the country and are usually held in large convention centers.

Getting Ready for the Fair:

Training:
In order to ensure that volunteers have a good experience and feel prepared, brief trainings will be provided. Trainings should not take more than 15-20 minutes. If it is not convenient for a volunteer to come to campus, remote trainings will be provided. Trainings will review the agenda for the day, your exact responsibilities, and important admissions materials.

You are not expected to know everything, or to have facts and figures memorized. It is okay if you do not know the answer to a questions. If you encounter a question that you cannot answer, you can simply refer them to the admissions office.
Volunteer expectations:
While staffing a college fair, you are serving as a representative of the university. We therefore expect that all volunteers meet the following expectations:

- Connect with your admissions contact ahead of time and determine where and when you should meet before the event.
- Maintain a professional appearance. Business casual is an appropriate dress.
- Arrive for the fair at least 20-30 minutes before the start of the event. This will give you time to find your booth and to prepare.
- Expect to stay for the entire event. If you do need to leave early, please communicate this ahead of time with the admissions contact.

What to Know about UNH:

General Information:

- UNH is the flagship university for the state of New Hampshire. Mission to provide services for the public good: education citizenry and engaging in research.
- With 12,500 Undergraduate students, and a total student population of approx. 15,500, UNH is considered a “mid-sized” institution.
- The location of campus is a big advantage for students. We are situated only 15 minutes from the seacoast, and only an hour away from Boston, Portland ME, and the start of the White Mountains.

Academics:

- Academics are broken into 5 College Divisions:
  - College of Engineering & Physical Sciences (CEPS)
  - College of Life Sciences & Agriculture (COLSA)
    Within COLSA is the Thompson School of Applied Science. Which houses associate degree programs in applied science.
  - College of Liberal Arts (COLA)
  - College of Health & Human Services
  - Paul College of Business & Economics
- There are 3 UNH campuses total:
  - Durham- which is the main campus
  - Manchester- urban non-residential campus
  - UNH Law- top 100 law school located in Concord
Research:
- UNH is designated as a land, sea, and space grant, research institution. Meaning UNH receives sizable funding to conduct research in those areas. For students this means that they will be learning from nationally/internationally known faculty who are attracted to UNH for its research focus.
- The Undergraduate Research Conference (URC) put on by UNH is one of the largest in the world. UNH’s commitment to undergrad involvement in research is exceptional and is definitely a major point of advantage for students. Undergrads are able to receive competitive grants to conduct research, both domestically and abroad.
- UNH offers over 100 different majors

Student Activities and Resources:
- There are over 250 recognized student clubs and organizations at UNH
- UNH houses 20 Division I athletic programs: 12 women’s teams and 8 men’s teams. A major renovation and expansion of Cowell Stadium was recently completed in 2016. There are also a number of club and intramural sports.
- Students have access to a variety of campus resources including: counseling center, health services, a newly renovated and expanded campus rec facility, writing and math centers, disability services, and much more.
- Each college division now houses career advising staff, devoted to providing career guidance to students and recent graduates.

Important Statistics:
- The first year retention rate is 85%. This is 10% above the national average.
- Our 4 year graduation rate is 68% and 6 year graduation rate is 79%. Both of these figures are approx. 20% higher than the national average.
IV. On Campus Admissions Programs

Overview:

One of the most powerful ways to get a student interested in UNH is to have them visit campus. Student who have visit campus are statistically much more likely to apply and/or enroll.

Admissions Campus Events:
- Fall Open House – Our Fall Open House is one of the largest events we host each year. Thousands of students and their families will come to campus to learn more about UNH. The Open House usually takes place on a Saturday in late September. Volunteers are needed to help provide directions and information about the day to guests.

Getting ready for the event:

Consider your audience:
Keep in mind the students that will be attending the event. Juniors in high school (and seniors in the fall somewhat) will be in a more exploratory phase, trying to figure out where they might want to apply. Their interests will likely be focused on the major and the campus in general. Admitted students on the other hand are trying to figure out which school they are going to commit to. Financial aid and housing become a much more important point of conversation.

Training:
In order to ensure that volunteers have a good experience and feel prepared, brief trainings will be provided. Trainings should not take more than 15-20 minutes. If it is not convenient for a volunteer to come to campus, remote trainings will be provided. Trainings will review the agenda for the day, your exact responsibilities, and important admissions materials.

Volunteer expectations:
While at an admissions event, you are serving as a representative of the university. We therefore expect that all volunteers meet the following expectations:
- Connect with your admissions contact ahead of time and determine where and when you should meet before the event.
- Maintain a professional appearance. Business casual is an appropriate dress.
- Arrive for the fair at least 15 minutes before the start of the event. This will give you time to find parking and to get to the designated part of campus.
• Expect to stay for the entire event. If you do need to leave early, please communicate this ahead of time with the admissions contact.

What to Know about UNH:

What’s new on campus?
• A number of exciting new majors, minors and academic programs!
• There has been a new addition to the Cowell Stadium complex, home of the UNH football team. Opening in fall 2016, the new facility features a walkway bridge, concession stands, a jumbo-tron, and new fan seating.
• The Hamel Rec Center is being expanded, to include a new outdoor pool facility, increased fitness space, and an instructional kitchen.
• Paul College’s FIRE program, which began for the 2015-2016 entering freshman class. Designed to engage, connect and challenge, FIRE is a yearlong program for first year business students. FIRE students work as a team, and with the help of staff and alumni mentors, are challenged to take on some of society’s most pressing issues.

Campus Maps:
V. Off Campus Admissions Programs

Overview:

The purpose of off campus events is often to encourage student “yield.” This is the term we use to refer to the rate at which admitted students enroll at the university. We want a high yield rate, which means a larger percentage of admits are enroll in May. Events meant to encourage yield are referred to as yield events, and they typically take place in the spring, following the Feb. 1st application deadline. The most common venue for these is in a hotel event space, but they could also take place in the home or business of an alumni or other campus partner. Off campus programs could be for any student though. The main purpose is to introduce UNH to students who might not otherwise be able to come to campus.

Getting ready for the event:

Training:
In order to ensure that volunteers have a good experience and feel prepared, brief trainings will be provided. Trainings should not take more than 15-20 minutes. If it is not convenient for a volunteer to come to campus, remote trainings will be provided. Trainings will review the agenda for the day, your exact responsibilities, and important admissions materials.

Volunteer expectations:
While at an admissions event, you are serving as a representative of the university. We therefore expect that all volunteers meet the following expectations:

- Connect with your admissions contact ahead of time and determine where and when you should meet before the event.
- Maintain a professional appearance. Business casual is an appropriate dress.
- Arrive for the event at least 15 minutes before the start time.
- Expect to stay for the entire event. If you do need to leave early, please communicate this ahead of time with the admissions contact.
**General Format:**
Agendas for yield events can vary, but tend to follow the same general format. Alumni are usually given a few minutes to speak about their experience, and will also serve to mingle with guests and answer questions that they might have.
- Light refreshments
- Introductions and ice breaker.
- Overview of UNH
- Guest speakers (parent, alumni, faculty) share their experiences
- Q & A panel for guests to ask questions
- Video and or PowerPoint about UNH
VI. Student Communication

Overview:

One major challenge in college admissions, is maintaining connections with students. Once a student applies and has been admitted, there is often very little contact between that student and the university. If the student applies early, it is sometime months before they will reach the next stage in the admissions process. That is why it is imperative that we continue to engage students throughout the admissions cycle.

Getting ready for the event:

Training:
In order to ensure that volunteers have a good experience and feel prepared, brief trainings will be provided. Trainings should not take more than 10 minutes. If it is not convenient for a volunteer to come to campus, remote trainings will be provided. Trainings will review your exact responsibilities, the content/nature of the communication, and an overview of the audience you will be communicating with.

Writing Postcards:
Postcard writing will begin in January and go to March. The main goal of these communications is to connect with admitted students and encourage “yield.” This is the term we use to refer to the rate at which admitted students enroll at the university. We want a high yield rate, which means a larger percentage of admits are enroll in May.

Volunteers who are able to come to campus on a designated “post card night” will write as many postcards as they can during the duration of their volunteer shift. Volunteers will be provided with guidelines and templates, and will be paired up with an admissions representative. These evenings typically last for 2-3 hours, and are a lot of fun -- multiple volunteers will be present and we will order pizza!

Volunteers who are not able to come to campus can still get involved. We will mail volunteers a set number of postcards (including a few extra), student contact lists, and guidelines and templates. When the postcards are complete, the volunteer should contact the admissions office to let them know. The volunteer will then drop the cards in the mail to have them sent to students. All postcards are pre-paid, so volunteers are not expected to pay for postage.
VII. Other Ways to Help

Advertise UNH!

The best way to help with admissions recruitment, if you don’t have time to volunteer, is to advertise UNH!

- Request swag- ask us to send you some materials! Depending on what we have available, we should be able to send you some swag to show off your UNH pride: pennants to hang on your wall, pins to wear, and bumper stickers too!
- If you are the parent of a high school age student, might they be interested in applying to UNH? Have you discussed with your social circles that you are an alum?

Provide Feedback:

The only way that the Alumni Ambassador program will grow and improve is by sharing your ideas and your honest feedback. This feedback could center on the program structure itself, a particular event you volunteered for, or ideas about our recruitment efforts. We cannot guarantee that all feedback will result in immediate change, but we will do our best to make sure that everyone feels heard. You will receive a brief survey after every volunteer session, to help us ensure that you had the best possible experience.
VIII. Additional Materials

Admissions Forms:

- Admissions and Financial Aid Overview
- Advanced Placement Information
- Athletics and Campus Recreation
- List of Academic Majors
- New England Regional Student Program (NERSP)
- Undergraduate Admissions Profile

College Information:

- College of Engineering & Physical Sciences
- College of Health & Human Services
- College of Liberal Arts
- College of Life Sciences & Agriculture
- Peter T. Paul College of Business & Economics
- Thompson School of Applied Science
- UNH Manchester
IX. Frequently Asked Questions:

Below you will find some of the most frequently that students and their families ask. This list is by no means exhaustive, but should give you a good starting place.

Q: Do you have “_________” major?
   A: When you hear this question, you can refer students to a list of academic majors. Sometimes though, it is useful to try to ask questions of the student, and learn more about what they are really interested in.

Q: What is the cost of attendance?
   A: For the 2017-2018 academic year in-state tuition, fees and housing totals to $29,333; out of state totals to $43,903. With these figures you can also share that approximately 80% of students receive some kind of financial aid, which would help offset these costs.

Q: What is your school known for?
   A: This can be a challenging question to answer. As a comprehensive research university, UNH is not necessarily known for any one thing. What makes UNH special is that we are a research intensive university that is also focused on the undergraduate experience. For a university of our type, students have uncommon access to faculty and research opportunities.

Q: Do you offer scholarships?
   A: We offer merit scholarships to both in state and out of state students. These awards are based on standardized test scores, GPA, and class rank (if available). If the school does not rank, we will only consider the GPA instead. There is no separate application for scholarships. Students who meet the criteria are receive the awards automatically. All of the criteria can be found on the unh admissions page.

Q: What is the minimum SAT and GPA to get in?
   A: It is important that students understand that we do not have any strict minimums. Our holistic application review means that we consider every aspect of a student’s application. In general though, we are looking for a B/B+ or better student, in a strong program of study. The average GPA for an incoming student is a 3.5/4 weighted, and the average SAT is an 1180.
Q: Can I have a car on campus?
   A: Freshman are not allowed to have cars on campus. It is still however very easy for students to get to where they need to go. The Wildcat Transit busses connect all of the different parts of campus, and can take students to the surrounding towns/cities in the NH seacoast region. The C&J bus line can take students to Boston or north to Maine. Similarly the Amtrak stop on campus can take students to either Boston or Maine. After freshman year, students are allowed to have cars.

Q: What is there to do in Durham?
   A: Durham is a wonderful college town, which very much caters to the student population. Durham offers restaurants and shopping options. The nearby cities of Dover and Portsmouth offer a number of great options as well. Portsmouth houses boutique shopping, restaurants, and arts/culture. The ocean is also only 15 minutes from campus.

Q: What internship opportunities do you have?
   A: Many students do take advantage of internship opportunities while at UNH. Some majors on campus do require internships as part of the program, for other majors it is just encouraged. Career services offers internship fairs every year to help connect students with industry partners. Every college division offers career services, and those advises work with students to set them on the path for career success.

Q: Do you offer study abroad?
   A: We offer more than 500 study abroad programs to over 70 different countries. Our study away advisors work closely with interested students to find the program that is the best fit for the student. Programs can be just a few weeks long, a semester long, or a yearlong. There are tons of options!

Q: What division sports do you offer? Do you offer “_____”?
   A: UNH is an NCAA Division I school. UNH offers 20 different varsity athletic programs.

Q: What support systems are there for students with disabilities?
   A: Our office of Disability Student Services (DSS) works closely with students with documented disabilities to provide necessary accommodations. Some common accommodations are extended time for tests, assistive technology, note takers, and quiet work spaces.
Q: What are the dining options on campus?
   A: UNH has 3 award winning dining facilities. The food at UNH is exceptional! In addition to
   the 3 dining halls, there are a number of quick service spots on campus, including an ice
   cream bar attached to the Amtrak station! We also have great options for those with various
dietary restrictions, including vegan options, gluten free options and more.

Q: Do you accept college credit?
   A: In most cases, we do honor college credit earned outside of UNH. It is quite common for
   incoming students to have earned some prior college credit, whether through AP
   coursework, or classes taken at a local community college. To receive credit for AP scores,
   students need to achieve the requisite score on the exam (usually a 4 or 5) and to send their
   official results to the admissions office. For a class taken at a community college or another 4
   year institution, students need a grade of C or better to receive credit.

Q: Do you offer interviews?
   A: We do not offer formal interviews as part of the admissions process. We are happy to
   meet with students and their families to answer questions and provide guidance, but
   structured interviews are not offered.

Q: How big is your school?
   A: UNH is considered a mid-sized institution, with approx. 12,500 undergraduate students
   and 2,500 graduate students.

Q: Are you a public school?
   A: Yes, UNH is the flagship, public research university for the state of NH.

Q: Do you offer Greek life?
   A: Greek life is offered at UNH, though it is not an overwhelming presence. About 10-15% of
   UNH students get involved in Greek life.
